

Model for Improvement

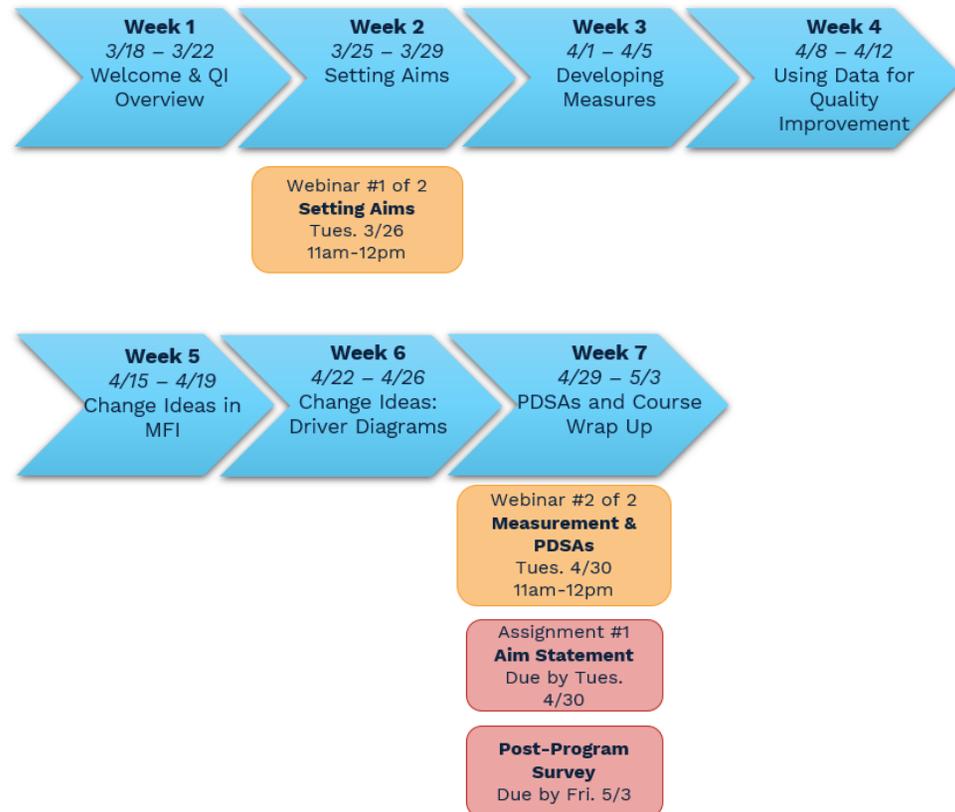

A seven-week virtual learning course hosted by [PBGH's California Quality Collaborative](#)

Register here by 3/14

Health care organizations constantly need to test and spread improvements in their clinical settings. One trusted method for quality improvement is through the application of the Model for Improvement, especially with a lens toward using QI for improving health equity. Through CQC's virtual seven-week course, learners will gain access to approachable **learning content, two live webinars with opportunities to connect with peers and get feedback on projects, weekly series of self-paced learnings, curated resources and tools and actionable assignments.** Learners will come away with the fundamentals of using the Model for Improvement to identify, test and launch system-wide changes that improve the quality of care for the patients they serve.

Participation
<ul style="list-style-type: none"> Two 60-minute live webinar sessions ~15-25 minutes of weekly self-guided learning
