Purchaser Business  
Group on Health

## Measure Set

The Purchaser Business Group on Health's (PBGH) Comprehensive Maternity Care Workgroup has articulated the [attributes](#) to define comprehensive maternity care which ensures high-quality, equitable maternal and infant health outcomes. To help identify hospitals and practices having implemented these attributes, PBGH utilized a multi-stakeholder process to define a measure set focused on equity, patient experience of care and health outcomes. These measures were selected based on their alignment with national measure sets and accreditation organizations and their ability to identify and evaluate high-performance in maternity care.

All measures will be required to be stratified by race, ethnicity and language (REaL) and sexual orientation and gender identity (SOGI) data where available.

	Measure	Data/Impact Level
1	<a href="#">NTSV C-section</a>	Hospital/provider
2	<a href="#">Prenatal depression screening and follow-up</a> & <a href="#">Postpartum depression screening and follow-up</a>	Hospital/provider
3	<a href="#">Maternity care: postpartum follow-up and care coordination</a>	Hospital/provider
4	<a href="#">Social need screening and intervention</a>	Health plan-wide*
5	Patient experience – <a href="#">CAHPS</a> and <a href="#">HCAHPS</a> for maternity population	Hospital/provider
6	<a href="#">Severe obstetric complications</a>	Health plan-wide
7	% of Midwife deliveries (claims-based)	Health plan-wide
8	% of Maternity patients who used a doula	Health plan-wide

\* Potential data collection/impact at the hospital/provider level

The midwifery and doula care measures are not yet part of a national measure set. Data specifications for these measures will be developed by PBGH members, and data collection will include both claims-based and manual data collection methods.

# Measure Set: Comprehensive Maternity Care and Industry Alignment

The Purchaser Business Group on Health’s (PBGH) Comprehensive Maternity Care Workgroup has articulated the [attributes](#) to define comprehensive maternity care which ensures high-quality, equitable maternal and infant health outcomes. To help identify hospitals and practices having implemented these attributes, PBGH utilized a multi-stakeholder process to define a measure set focused on equity, patient experience of care and health outcomes. These measures were selected based on their alignment with national measure sets and accreditation organizations and their ability to identify and evaluate high-performance in maternity care.
